Geiger Field

# SPLINTERVILLE

Outside the high-rent district, but it was our first home where we worked and played as a unit. With the construction of a concrete taxiway and two smooth new asphalt streets for Geiger, the '02 had already achieved a reputation for getting the job done.

# PRIEST LAKE

# TIM-BER-R-R

Nestled in the thick, tall pines of Idaho, the Deuces spent October and November tasting life under field conditions. We found time for the Beer-X and even a Bond Rally starring 'Bruno' Litwak.

The Battalion's first airstrip — a beauty. Each line company contributed 1000 feet. Strong backs counted as the 'Aviation' Engineers constructed three bridges.

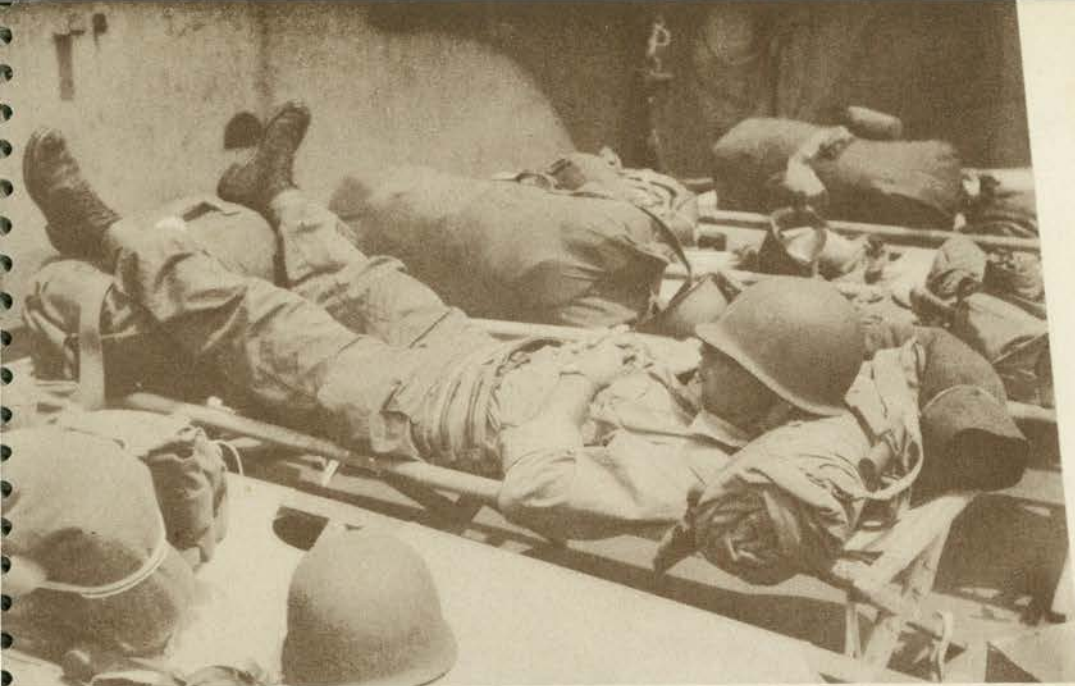

# TS/POE

Where do we go from here? POM inspection December 10th didn't give an inkling. Furloughs and then Goodbye Geiger on February 7th. Seattle — then 54 days on LSTs by way of Oahu, Eniwetok, Guam and Mog-Mog to Okinawa. This was the shootin' war!

The stuff came off a whole lot faster than it went on. For the first time we heard the nerve-wracking chatter of machine guns, the nasty crack of the sniper's bullet and wondered if we'd get ours here.

Ernie Pyle got his with the 77th Division on this little three by five pimple. We concentrated on digging in.

Here was the answer to the months of training. Three strips completed before VJ. 24 hours a day through rain and blistering sun, but it was worth it and 1,200 planes daily flying from our strips helped smash Japan into submission.

'Cease Firing' came with prayers of thanksgiving on August 15. Time for baseball—swimming in the China Sea—no more red alerts during movies. The 19th brought the Jap Bettys with the 'unconquerables' come to give up their empire and on September 2nd General MacArthur signed the armistice.

ONAHANA

Okinawa—final stronghold of the crumbling Jap Army where for 82 bloody days and nights raged the fiercest battles of the Pacific campaign. Here had stood cities. Now there was dust, the shell of an office building, tomb pillboxes, battered church at Shuri, an unused Baka bomb, and, of course, the dead.

Civilization again—on October 7th after seven months.  
We landed in a picturesque setting of shipyards, picture  
post card harbors and quaint, terraced farms.

Here we stayed for three weeks  
weathering a typhoon, living in Jap  
barracks and shopping for souvenirs.

And from these had come the enemy! From these crude farms, foul-smelling streets, from these small, poorly dressed, polite little people had come the once-powerful Japanese Army. It was unbelievable.

It was a full time job keeping a battalion of hard working engineers on their feet 24 hours a day, but infection from injury was checked on the spot by the ever-present medical corpsmen, during training and operations Stateside, and under fire on Ie Shima. Shots and vitamins, bandaging cuts, physical inspections and dental care were the monotonous routine of the efficient medics.
